Give a brief (280 character) summary, eg, focal species, field study site, nature of data. If you aren't currently working on research, give details of a past or future project.

:

What statistical tools or data-analysis software are you familiar with?

:

What would you like to gain from this workshop?

:

Other comments or questions:

This information will be used by the organisers to select participants and will be shared with the instructor team. Your name and email contact will be retained so that we can send you information on this and similar workshops.

Please remember to **save** the file before emailing to **stats.myanmar@gmail.com**. Please send from the same email address that you gave in the form – this allows us to cross-check that the email is correct.

You should receive a response within 4 working days. If not, please check your junk/spam mail box before emailing us at ngwe.lwin@fauna-flora.org with “Registration problem” in the subject line.

Do not make any payment until your place at the workshop is confirmed.
